Arrays of objects (Ch. 8.3)

Talked about Arrays, talked about Objects...

Array of 10 BankAccounts:

//create the array:
BankAccount[] accts = new BankAccount[10];

//fill the array:
Scanner scan = ...

for (int i = 0; i < accts.length; i++) {
    String name = scan.nextLine();
    String num = scan.nextLine();
    double bal = scan.nextDouble();
    BankAccount acct = new BankAccount(name, num, bal);
    accts[i] = acct;
}

for (BankAccount acct...
    BankAccount acct = new BankAccount();
    name =
    num =
    bal =
    acct.setName(name);
    acct.setNum(num);
    acct.setBalance(bal);
    //deposit $100
    accts[i].deposit(100);
