Discussions

Have you dreamt of a magical place full of other computer scientists looking for jobs, participating in programming contests and hack-a-thons, interested in graduate school, talking about research projects, or developing the next tech start-up? Are you looking for a mentor in a specific field or industry, students who belong to a similar affinity group, or those interested in having conversations around the intersections of computer science, ethics, and policy? Are you on the verge of obtaining a CS degree and aren't quite sure what to do with it? If any of these sound close to home, a computer science conference for undergraduates may be the perfect event for you to attend. Conferences we will discuss include the Grace Hopper Celebration, Richard Tapia Celebration of Diversity in Computing Conference, Students@SC (Supercomputing), National Council of Undergraduate Research Conference, and many more. Furthermore, we will highlight several sources of funding, so that you may participate in a conference with little to no out-of-pocket expenses.

Friday, February 22, 2019

12:30 p.m.

McCardell Bicentennial Hall 220

Pizza will be served at 12:25 p.m.

This event is sponsored by the Computer Science Department
